JIM BUCK ROSS
COMMISSIONER

TO THE PEOPLE OF THE STATE OF MISSISSIPPI:

Agriculture is the lifeblood of the economy of the State of Mississippi. Agriculture supplies our industry and commerce, feeds and clothes us, and allows us to sell goods abroad.

We in the Mississippi Department of Agriculture and Commerce are fully aware of the importance of Agriculture in the total economy and pledge our efforts to further develop our State's greatest industry.

One of the many responsibilities of your Department is that of providing facts on Mississippi agriculture. This publication contains a comprehensive record of Mississippi agriculture information for the period of 1974-1980. The report was prepared by the Mississippi Crop and Livestock Reporting Service, combining the cooperative efforts of the Mississippi Department of Agriculture and Commerce and the Statistical Reporting Service of the United States Department of Agriculture.

I appreciate the voluntary cooperation of farmers, ranchers and business people in compiling this information.

The ability to make the best decision at the right time often means the difference in profit or loss. This basic, factual information is made available to aid your decision making. In this day of rapid changes we cannot overstress the importance of having good information to measure our progress and guide us in developing sound programs for the future.

Respectfully

Jim Buck Ross

Commissioner

This edition of Mississippi Agricultural Statistics contains data for all years from 1974 through 1980. This time period covers the years from the previous Census of Agriculture (1974) through the most recent Census of Agriculture (1978) as well as the years 1979 and 1980. These intercensal years are included to reflect any revisions that may have been necessary.

The Census of Agriculture historically has been taken in the fourth and ninth year of each decade. The Census Bureau of the Department of Commerce conducts a number of other quinquennial censuses in the second and seventh years of the decade. In order to bring the Census of Agriculture into step with these other censuses, it was decided to take an agricultural census in 1978 and 1982, for only four year intervals, after which the agricultural census would be synchronized with the other censuses. After this adjustment the agricultural census would return to a five year interval in 1987.

In Mississippi in 1980 temperatures were well above normal throughout the State during the summer. Highs of 100° and above were commonplace during part of July, all of August and much of September. This was also a period of little rainfall and soil moisture was short to very short during the critical fruiting period. These adverse conditions were reflected in poor yields for most crops.

It seems that people in agriculture and all the various industries serving or depending on agriculture have an insatiable appetite for more detailed and varied information. Mississippi Crop and Livestock Reporting Service has put forth effort to provide the best data possible because we are aware that good statistics are the basis for making sound production and marketing decisions.

I have said it before but it will bear repeating again -- Thank you, to all who have helped provide these data.

Sincerely,

Dick

Dick Knight
